About Rouse

Rouse is a specialist IP consultancy, providing the full range of IP services to many of the world's leading IP owners.

Established in the United Kingdom in 1990, it now has 16 offices in Africa, Asia, Europe and the Middle East, as well as an associated office in Saudi Arabia. Rouse is regularly ranked among the leading IP firms in the various jurisdictions in which it operates.

Its team of more than 600 includes IP professionals from a wide range of disciplines. Lawyers, patent and trade mark attorneys, researchers and specialist IP investigators work seamlessly together, combining a high level of professional skills and experience with 'on-the-ground' practical and commercial know-how.

Rouse in Indonesia and Timor Leste

Indonesia

Achieving effective intellectual property rights protection and enforcement in Indonesia requires patience, dedication and local know-how. We have a longstanding presence in the country, having handled a steady flow of work here since 1990. We opened our office in Jakarta in early 1997.

Working in association with local law firm Suryomurcito & Co. (established simultaneously with Rouse in Indonesia), we provide the full range of intellectual property services. Our team in Jakarta now comprises more than 60 people, from a variety of backgrounds and specialist disciplines.

Timor Leste

Since 2006, we have been offering intellectual property services in Timor Leste, including industrial design, patent and trade mark re-registration and placement of cautionary notices. We also handled the first domain name dispute in Timor Leste.

Our Services

We provide all round services for all aspects of intellectual property protection, commercialisation and enforcement in Indonesia and throughout the South East Asia.

Investigation services

A strong in-house information collection and analysis capacity is crucial to the provision of an efficient, high quality service in this area.

That is why we created our own dedicated investigation team with in-depth knowledge of intellectual property issues. We now have a large team working in Indonesia and the surrounding region. It liaises closely with our investigators in other jurisdictions, as well as with an established network of agents, information providers and other contacts throughout the region.

Enforcing intellectual property rights

We handle a wide range of contentious matters, ranging from oppositions before the Trade Marks Office and actions

in the Commercial Court, to large scale enforcement actions against infringers. We have particular experience in the organisation and management of brand enforcement programmes throughout South East Asia. We also work with administrative authorities to control infringements e.g. with Customs to detain infringing goods as they arrive in Indonesia. We also conduct raids against infringers, from simple local actions against counterfeiters to complex regional actions.

Commercialising intellectual property

In addition to our filing services, we provide general advice and handle commercial work including strategic planning, licensing and assignments. We also provide specialised intellectual property support services in relation to mergers, acquisitions and other corporate transactions.

Filing and prosecution

We provide a full trade mark, copyright, design and patent searching, filing and prosecution service, supported by the technology required

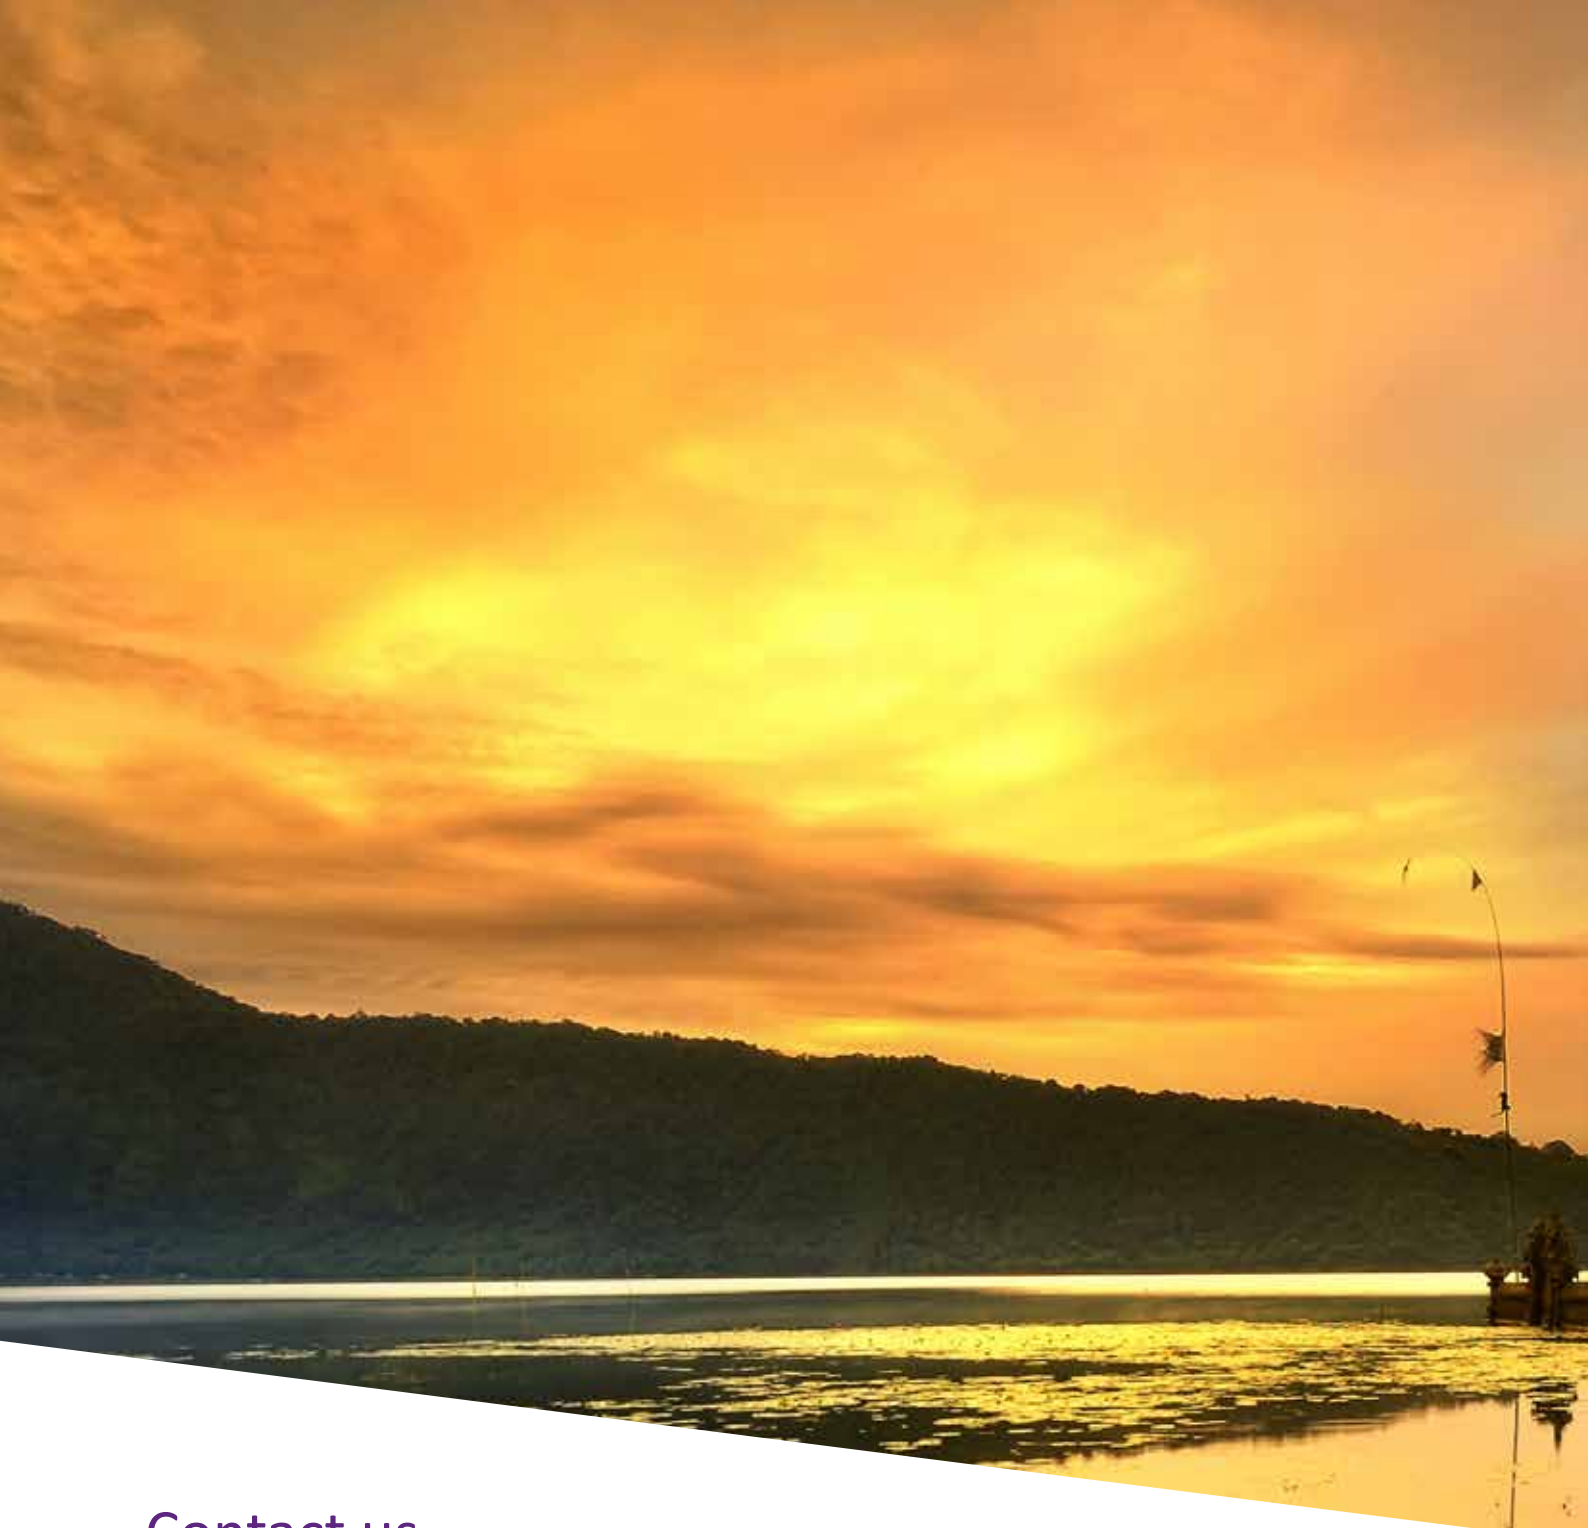

to meet today's client service expectations. We also offer filing services in relation to plant variety rights and integrated circuit designs.

Key features include:

- efficiency and reliability, using a custom designed database to which clients may have direct access;
- prompt response;
- comprehensive and clear reporting; and
- competitive pricing.

Clearance, filing and prosecution work is carried out on a fixed-fee basis.

Details of the services offered and their associated costs are set out on our website: www.rouse.com. We seek to provide the most efficient, transparent and competitively priced service available in Indonesia.
